BAT SONAR
PROXIMITY ALERT SYSTEM

Alert your forklift operators of nearby pedestrians and obstacles when travelling in reverse with the Bat Sonar Proximity Alert System. The Bat Sonar is available in a camera and 7" monitor model that produces a visual and audible alarm or a speaker only model that produces an audible alert for the operator. Each system includes two sensors with magnets and additional sensors are available (accommodates up to four sensors).

Bat Sonar Features

- 12 - 55V Operating Voltage
- Includes 20 feet of plastic cable sleeve
- Accommodates up to four sensors
- Detection range begins at 4 feet
- Audible alarm intensifies as pedestrians or object nears
- High Sensitivity Digital Radar produces low false alarm rate
- Detection angle approximately 70 degrees for each sensor
- Anti-jamming housing design with anti-interference properties
- 1 year warranty

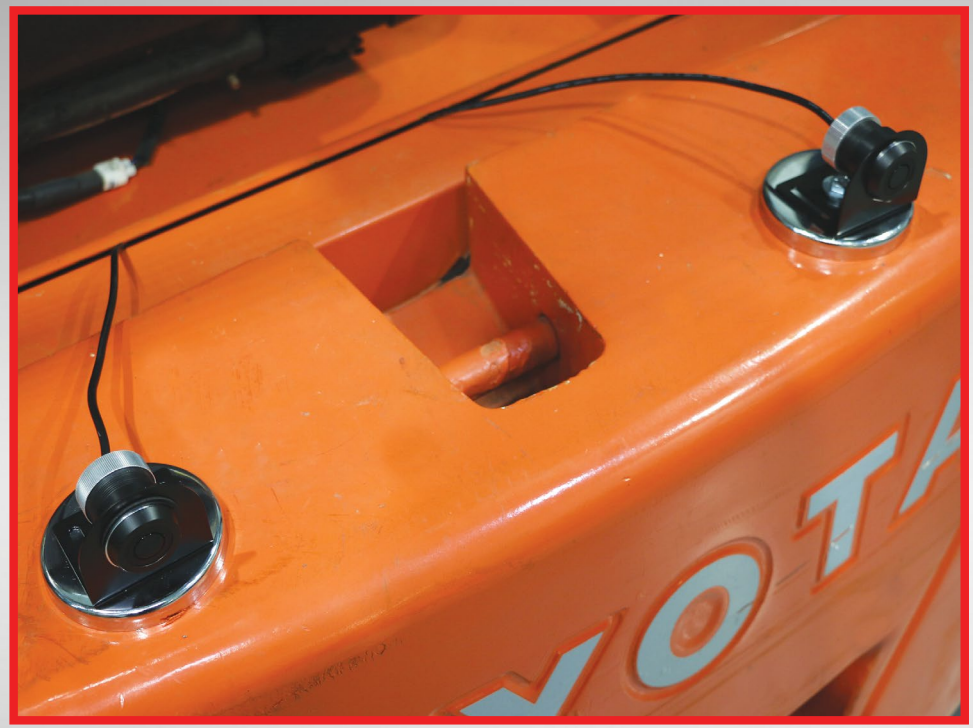
BAT SONAR
PROXIMITY ALERT SYSTEM



The sensors can be conveniently mounted anywhere on the forklift with the 100lbs pull tested mounting magnets.

The alert speaker for the Bat Sonar speaker can be mounted near the operator and also has a volume adjustment button.

BAT SONAR
PROXIMITY ALERT SYSTEM

The Bat Sonar Monitor shows the operator a clear operating area where the camera is mounted.

The sensor detects anything within 4 feet of the forklift and alerts the operator with an alert and also shows the distance from the object itself.
