RED-ZONE

LED PEDESTRIAN WARNING LIGHT

40% of all forklift accidents involve a pedestrian. Ensure pedestrians stay a safe distance away from the lift truck with the Red-Zone LED Warning Light. The Red-Zone emits a red beam on the floor to keep pedestrians away preventing foot injury or collisions from rear end swing.

The Red-Zone combined with the Blue Light offers a complete pedestrian warning system for your warehouse.

A photograph of a warehouse aisle. On the left, there are tall metal shelving units filled with cardboard boxes. In the center, a black forklift is moving away from the camera. On the floor, there are two bright red rectangular lights and one bright blue circular light. The scene is dimly lit, with the primary light sources being the forklift's headlights and the floor lights.
